

The *Liquor* SHACK

After a few of these your daughter may pass out leaving her vulnerable to sexual assault.

A drink for all occasions. They may wake up the next day and forget what they did.

A dangerous cocktail for any of your children.

Give your son a few of these to take out with him and there's a chance he'll spend the night in hospital or a police lock up.

If you choose to supply your under 18s with alcohol, please remember you're responsible for the consequences.
